NO VISITORS
Dear visitors, dear patients,

unfortunatelly we can **not allow any visitors** during this time.

This measure serves to protect both our patients and our employees.

Thank you for your understanding and cooperation!

Small patients are currently excluded from this new regulation, who are in the hospital with a parent. Such as:

- Visits to patients at the end of their lives
- Partner at birth and at the puerperium
- Visits to premature babies / children / adolescents
- Accompanying admitted acute patients by relatives (1 accompanying person per patient)
